

CONCRETE

Uncommon Concrete

Concrete Countertops & Decor

Concrete is becoming the new medium of choice for homeowners, designers and architects who wish to set themselves apart from the crowd. Concrete is the truly custom material. Beginning in a fluid state, concrete can be molded to any shape. Cast and removed, the surfaces can be honed or polished to the desired look and feel. There is a limitless number design options that may be utilized including cast in trivets, integral drain boards, channels or even sculpted images or writing. Concrete provides a blank canvas upon which the client can truly express themselves. We at **Concrete** are dedicated to that idea and can help you realize it.

Concrete makes more than just countertops. Fireplaces, sinks and vanities are just a few of the projects we have undertaken. Whether you want to test the waters with a vessel sink in the guest bath or make a bold statement with a striking mantel in the main room, **Concrete** can produce just what you desire. .

We work with 3D computer models that allow you to design by feel and watch your ideas taking shape. All **Concrete** casting projects utilize a specially designed, high performance concrete that will bring you years of low maintenance enjoyment. Each project is as unique as it is beautiful. Let us show you the possibilities of concrete and the capabilities of **Concrete**.
